Introduction

Choice and flexibility are key, which is why Kubix offers a range of traditional and contemporary kitchen designs.

Kubix maintains a rigorously high standard at all levels. From design to production methods, we provide quality kitchens which are built to last, each one conforming to the high standards of our quality assurance programme. This has earned Kubix a range of industry recognised standards.

- ISO 9001-2000

The Symphony Group was the first in the industry to achieve this certification. Quality management processes are all about continuous improvement, review and development. Symphony was awarded this certification in recognition of the quality and consistency of its production and control systems.

Symphony was the first furniture manufacturer to be awarded the prestigious ISO Quality Management System Award BS EN 9001:2008 for its installation and customer care operations.

We can now provide our customers with a quality assurance standard for the complete service from manufacture and delivery of product, through to on site installation and post completion customer care. This has been achieved by implementing the same quality systems to the delivery and installation of product including the independent quality auditing of fitters and completed installations.

Product Performance

- BS 6222 Part 2 Level H
- FIRA Gold Award

Following stringent appraisals, Kubix's products have achieved the above certifications based on all cabinets, drawer fronts and drawer boxes complying with requirements for structural integrity and surface performance. They have also been evaluated for aspects of workmanship and fitness for purpose.

Our range selector gives you a complete overview of what Kubix has on offer - frontal options, handle options and worktops can be selected at a glance.
