THE SHAPE OF THINGS TO COME

The primary tasks in a home kitchen are food preparation, storage, and cooking, and a well-designed kitchen will include ample space for all three, plus seamless movement in between the activity zones.

To be truly efficient, everything you need for each task will be close to hand. So if the shape of your kitchen is U-shaped, L-shaped, galley or otherwise, a layout using the concept of activity zones can change the way you use your kitchen.

DESIGNER TIP

When redesigning a kitchen, put function first. Whatever the kitchen shape, plan for ease of movement between activity zones, and having everything close to hand.

1

Creating a space to socialise

The kitchen has taken over from the dining room as the place to relax and socialise. A bar with stools or an island unit offers extra kitchen workspace as well as creating a central focal piece.

CHANGE YOUR LIFESTYLE AROUND THE ISLAND

3

Freedom to cook

For those wanting to release their inner chef, the ultimate gourmet kitchen requires lots of space for easy manoeuvring and top of the range gadgets to prepare and cook your exquisite meals.

2

A place to relax

The kitchen has changed with the times we live in. It has become an all purpose room where everyone gets involved. It is a place to relax and entertain as well as a place to cook.

CONTEMPORARY STYLE

Modern contemporary style takes cues from old factories and industrial spaces. Popular features include weathered wood, exposed brick, industrial lighting fixtures and concrete. Alta's range of finishes in matt, gloss and timber effect sit well with the neutral, rustic and metal finishes of this popular design trend.

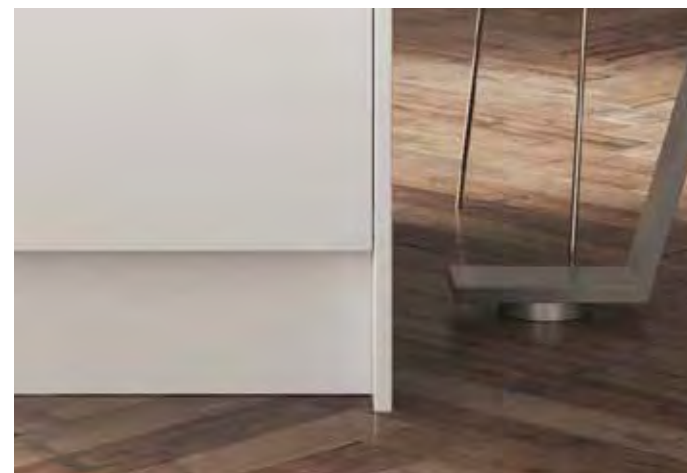

Gloss Pure White with Aluminium Inline trim

A L T A

The matt black Inline trim creates a modern masterpiece and black glazed cabinets provide a co-ordinated show piece feature. Whilst Alta's 12mm framing panels and lift up wall cabinets complete a modern design.

CREATING HARMONY

Finding the balance of carefully selected background colours often work best in pastels. These tones blend beautifully with dark or white tones and allow accent colours to spice up your kitchen and add your own personality. Teal, paprika and saffron are on trend to create a stylish cultured feel.

DESIGNERS TIP

When planning your kitchen colours, think about the whole room: walls, floor, cabinets, and work surfaces. For palette inspiration, look at colours that exist together in nature or find inspiration in your prized possessions or collections.

PRECIOUS MATERIALS

CREATING COMBINATIONS

Growing up in both our natural and cultural surroundings makes us familiar with the world around us. We can recreate these emotions inside our living environment with materials that create harmony. Use combinations of engineered and organic materials and incorporate metals, stone or wood to create harmony in your home.

DESIGNERS TIP

Introduce warmer metals like copper and brass, or create visual impact with marble. You can also incorporate splashbacks and worktops that are luxurious but practical.

Cranbrook is the perfect kitchen to showcase this trend as it provides a versatility that allows it to be the centrepiece of almost any kitchen design.

CREATING CONTRAST

DESIGNERS TIP

The simplest way of making your kitchen stand out is to have two tones. Basic rules for this is to have your darker doors lower down in the design. You can also run that colour through into the tall cabinets as well.

BLACK & WHITE

Black and white is a classic pairing that's always in style. Pure and clean, the combination goes well with vintage style, or looks equally great in a contemporary setting. Never out of fashion, dark and light dare you to be different.
